CERCA DE TI

WWW.ANACER.COM

ANACER's artificial intelligence that helps create life.

It is a new AI tool capable of analyzing your embryos and providing your medical team with precise information to personalize your treatment.

WHAT MAKES US DIFFERENT:

- ✓ No biopsies
- ✓ No risks
- ✓ Objective information

WHAT INFORMATION DOES IT PROVIDE?

Personalized Study

Individual assessment of each embryo

Detection of Alterations

Greater safety regarding chromosomal abnormalities

Effective Prioritization

Clear prioritization of the embryos with the highest real chances of success

Birth Probability

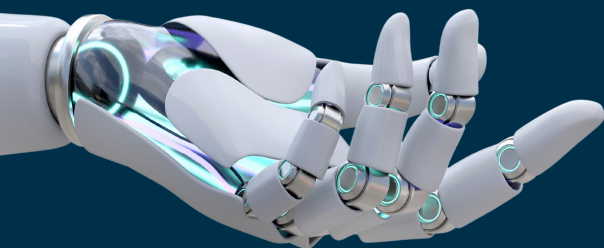

Prediction of real live-birth probabilities

LIFE Predict supports—but never replaces—the medical team's judgment.

CLOSER TO YOUR PREGNANCY CREAM

LIFE Predict generates a score between 0 and 10 that indicates the embryos' reproductive potential.

- More precise embryo selection
- Fewer transfers needed
- Up to 20% higher live-birth rate
- Non-invasive and scientifically validated method
- Greater clarity in the most complex cases
- The embryo is monitored using timelapse technology
- More than 90 parameters of its development are analyzed
- The higher the score, the greater the probability of success
